**Wavefront Energy and Environmental Signs Agreement with
Environmental Resources Management North East Inc.**

- Sales, Distribution, and Implementation Agreement for Pressure Pulse Technology (PPT) -

EDMONTON, Alta April 22/ Wavefront Energy and Environmental Services Inc. (the "Company"), a provider of innovative technologies for fluid flow optimization and monitoring processes, is pleased to announce it has entered into a non-exclusive marketing, distribution, and implementation agreement with Environmental Resources Management North East Inc. (ERM) of Boston, MA.

ERM is one of the world's leading providers of environmental consulting services delivering innovative solutions for leading business and government clients, assisting them in managing their environmental and related risks. ERM is a privately held company with over 100 offices in 37 countries, and a staff of over 2,400.

"ERM views this agreement with Wavefront as a key part of our strategy as a leader in the application of innovative remediation solutions for our clients" commented Mr. Rick Lewis, a Partner in ERM.

Mr. Brett Davidson, President and CEO of Wavefront Commented, "We are very pleased to be working with a company such as ERM who have a world wide presence in the environmental sector and could rapidly integrate PPT into its remedial services. We have long believed that PPT is a game changing technology for the environmental industry and will result in a fundamental change in the way that environmental remedial programs are viewed, planned and executed. We believe ERM will aid in this process."

About Wavefront Energy and Environmental Services Inc.

Wavefront develops, markets, and licenses proprietary technologies in the energy and environmental sectors. The Company's *Pressure Pulse Technology* for fluid flow optimization has been demonstrated to increase oil recovery. Within the environmental sector, PPT accelerates contaminant recovery and improves in-ground treatment of groundwater contaminants thereby reducing liabilities and restoring the site to its natural state more rapidly.
