

**Wavefront Energy and Environmental Signs Agreement with
Top Gun Sand Pumps & Rentals Ltd.**

- Sales and Distribution Agreement for Pressure Pulse Technology -

EDMONTON, Alta May 12/ Wavefront Energy and Environmental Services Inc. (the "Company"), a provider of innovative technologies for fluid flow optimization and monitoring processes, is pleased to announce it has entered into a non-exclusive sales and distribution agreement with Top Gun Sand Pumps & Rentals Ltd. ("Top Gun") of Alberta.

Top Gun will be marketing Wavefront's Pressure Pulsing Technology (PPT) to heavy oil production companies in the areas of: chemical placement, continuous pulse pumping, and improved injectivity during waterfloods and for disposal wells. The Top Gun agreement will also provide the Company with a presence in Alberta's heavy oil regional markets.

The Alberta Energy and Utilities Board (Alberta EUB) reported that for the period ending December 2003 there were 9,629 operating heavy oil wells in Alberta. It is common practice for producing wells to undergo servicing due to mechanical or reservoir troubles stemming from the production process. The frequency of well servicing may range from several months to a period of a couple of years for any given well. The Alberta EUB also reported that 4,682 water injection wells for secondary oil recovery and 1,288 disposal wells were in operation for the same period. With the vast number of wells operating in Alberta, the agreement with Top Gun represents significant opportunity to further the implementation of PPT.

PPT has applications in the oil industry, wherever there are wells producing oil, injection of liquids, or wherever there are abandoned oil properties with inactive wells but substantial amounts of oil remaining in place. As a result, management believes PPT will result in a fundamental change in the way that oil production and improved oil recovery are viewed, planned and executed. Management will continue to secure relationships such as the Top Gun and previously announced Environmental Resources Management North East Inc. agreement to expedite the advancement and commercialization of PPT.

About Wavefront Energy and Environmental Services Inc.

Wavefront develops, markets, and licenses proprietary technologies in the energy and environmental sectors. The Company's ***Pressure Pulse Technology*** for fluid flow optimization has been demonstrated to increase oil recovery. Within the environmental sector, PPT accelerates contaminant recovery and improves in-ground treatment of groundwater contaminants thereby reducing liabilities and restoring the site to its natural state more rapidly. Wavefront trades on the TSX Venture Exchange under the symbol WEE and the Company's website is www.onthewavefront.com.
