TSX-V: WEE

WAVEFRONT ENERGY & ENVIRONMENTAL SERVICES INC.

Signs Environmental Agency Agreement

EDMONTON, Alta May 19/ Wavefront Energy and Environmental Services Inc., a provider of innovative technologies for fluid flow optimization and monitoring processes, is pleased to announce it has entered into a non-exclusive marketing, distribution, and implementation agreement with Stratum Environmental Engineering Company Oy. (SEECO) of Helsinki, Finland.

“SEECO believes that there will be a demand for Wavefront’s DeepWave technology in the ground water remediation markets of the United Kingdom, Nordic countries, the Baltic Rim countries and the Russian Federation,” commented Mr. Heikki Jutila, Technical Director of SEECO.

Mr. Brett Davidson, President and CEO of Wavefront commented, “The request by SEECO to market and implement our DeepWave process in this new market is evidence of the growing global interest in the technology. We anticipate the efforts of SEECO will result in further implementation of the DeepWave process in the environmental sector.”

In connection with the Company’s News Release of May 3rd, 2005, the Company received TSX Venture Exchange approval to extend the expiry date of all the 1,370,501 originally issued non-transferable share purchase warrants (“Warrants”) from May 31, 2005 to August 31, 2005. The Company also received TSX Venture Exchange approval to a price amendment on 1,238,171 of the originally issued Warrants from \$0.55 to \$0.40. The remaining 132,330 originally issued Warrants will have no change in the exercise price of \$0.55. Directors of the Company hold 137,050 of the Warrants being amended in price and all of the Warrants in which the price is not being amended. As of the date of this News Release none of the originally issued Warrants have been exercised.

About Wavefront Energy and Environmental Services Inc.

Wavefront develops, markets, and licenses proprietary technologies in the energy and environmental sectors. The Company’s *DeepWave Technology* for fluid flow optimization has been demonstrated to increase oil recovery. Within the environmental sector, the DeepWave process accelerates contaminant recovery and improves in-ground treatment of groundwater contaminants thereby reducing liabilities and restoring the site to its natural state more rapidly.
