WAVEFRONT ENERGY & ENVIRONMENTAL SERVICES INC.

**DEEPWAVESM WELL STIMULATION
PERFORMED IN ROGERS COUNTY, OKLAHOMA**

EDMONTON, Alta April 25, 2006/ Wavefront Energy and Environmental Services Inc., a provider and licensor of its proprietary DeepWaveSM (http://onthewavefront.com/dw_what-is-deep-wave.htm) Technology for improved oil recovery and groundwater remediation is pleased to announce that the first of seven DeepWaveSM acid stimulations has been successfully completed in the Company's oil field lease in Rogers County, Ok.

The stimulation was performed as a preparatory stage to the installation of the Company's DeepWaveSM waterflood injection tool, which is being commercialized as the "Dragonfly". Background production and injectivity data has been obtained and the installation of the Dragonfly tool is imminent. Five additional acid stimulations are to be conducted in water injectors where four future Dragonfly installations are planned as well as the installation of a new concept waterflood tool being collaboratively developed with the Company's licensed service provider. The installation of the new concept tool is expected in several months. The seventh stimulation is planned for the recently completed horizontal production well.

Wavefront President and CEO Brett Davidson stated, "We are pleased with the progress we have made in Rogers County and anxiously await the installation of the Dragonfly tool. The next several months will be very exciting for the Company as the positive results we expect come to fruition. Additionally, the installation of a new concept tool developed in collaboration with our licensed provider continues to demonstrate the strong commitment each party has in successfully entrenching the technology as the injection technology of choice in the global oil and gas sector. The Company looks forward to updating the market on continued progress."

About Wavefront Energy and Environmental Services Inc.

Wavefront develops, markets, and licenses proprietary technologies in the energy and environmental sectors. The Company's DeepWaveSM Technology for fluid flow optimization has been demonstrated to increase oil recovery. Within the environmental sector, DeepWaveSM Technology accelerates contaminant recovery and improves in-ground treatment of groundwater contaminants thereby reducing liabilities and restoring the site to its natural state more rapidly.
