Leading Oil-Industry Executive Joins Wavefront Board of Directors

EDMONTON, Alta July 14, 2010 – Wavefront Technology Solutions Inc. (“Wavefront” or the “Company”; TSX-V: WEE), a leader in technology development and implementation for improved oil recovery and optimized groundwater remediation, is pleased to announce that Jeff Saponja, P.Eng. has joined Wavefront’s board of directors.

Saponja brings more than 20 years experience in providing insightful corporate leadership, developing new technologies, and growing new companies.

Jeff currently serves as Director, President and CEO of TriAxon Oil Corp.; a privately held light oil focused junior oil and gas producer. TriAxon raised approximately \$70 million in May of 2010, with aim to develop two Western Canada Basin light oil resource play prospects using the horizontal multi-stage fracing method.

Saponja was a founder member, Director and the President/CEO of TriAxon Resources Ltd, which formed in May of 2006 with an initial private placement financing of \$40 million. In December of 2009, Crescent Point Energy Corp. acquired TriAxon in all share deal for approximately \$250 million. TriAxon was a unique light-oil resource play focused private junior oil and gas producer that successfully combined proficient well engineering with exceptional geo-science. TriAxon was an early adopter the horizontal multi-stage fracing method and successfully deployed it in four areas within the Western Canada Basin.

Mr. Saponja has also served in a number of senior management positions including executive roles at Weatherford Canada Partnership, Shell UK and Husky Oil. He also co-chaired the IRP-22 committee, which was established to set Canadian industry standards for application of underbalanced and managed pressure drilling technologies.

Mr. Saponja commented, “Wavefront’s advanced technologies and associated products possess considerable potential for cost effectively increasing recoveries from known reservoirs. I’m excited to be part of a forward-thinking and motivated team that I believe will have a positive and material impact on the oil and gas business globally.”

“Wavefront’s products are rapidly becoming in demand around the world, and Jeff’s experience will help us enormously to maximize the potential of these opportunities,” said Wavefront chairman Steve Percy. “He has a proven track record for growing companies successfully, and brings a highly valuable perspective on how we can take Wavefront to the next level. Wavefront is stronger today with the addition of Jeff Saponja to our board of directors and we all look forward to his keen insights and knowledge of the oil industry.”
